The Sanitary Engineer and I inspected the spot on the 12th instant with the Health Officer. The ground selected for house sites is traversed and surrounded by ever so many hallas and channels that it will take a good bit of money to bring it into condition There is a hillock running into the sites Its existence is detrimental to the lay out The plot selected does not admit of any expansion as it is bounded practically on all sides by valleys and hillocks

We happened to inspect the existing poor houses block containing about 50 houses and found their sanitary condition wretched in the extreme The proposed extension will be a repetion of this block

I do not consider the extension proposed suitable

With a view to see if any other sites are available in this direction of the city we examined the area to the south and east of the Health Camp near Siddapur We thought that this ground would serve the purpose of an extension better than the present proposal

I therefore recommend that the lay out in the area near the Health Camp may be investigated
